

# Take Your Web Events to the Next Level

## Flawlessly Deliver Professional-Quality Webcasts

GlobalMeet Webcast is the most reliable, enterprise-grade live streaming events platform delivering superior support and technology for any audience in the world. Whether your need is for a global town hall, an investor meeting or a high-profile marketing or training event, you can easily create, broadcast and record professional-quality webcasts to hundreds or thousands of viewers anywhere, on any device. With GlobalMeet Webcast, multiple presenters can interact and engage with attendees and benefit from powerful analytics to measure event success.

### High-Quality Events for Any Size Audience

GlobalMeet Webcast provides functionality, admin controls and global capabilities to manage and scale your event to any size audience, on any device, using a single URL. Choose a self-service experience for a do-it-yourself approach or fully managed services for complete, white-glove end-to-end event support. Either way, you'll have 24/7 live access to our award-winning event experts to ensure your event runs smoothly.

### Robust Functionality for Impactful Events

GlobalMeet Webcast helps you produce and deliver professional, fully branded webcasts for your most important events. With interactive features like live Q&A, polling, and social media feeds, you can deliver an engaging and interactive audience experience. Using the sim-live functionality, edit and repurpose recorded material and post for on-demand access.

#### HD Video Streaming

Flexible HD video streaming with zero network bandwidth interruption

#### Enterprise-Grade Security

Ensure your message is only delivered to your intended audience

#### Global Scalability

Host and broadcast professional-quality video webcasts to any size audience in the world

### **Enterprise-Grade Security**

Maintain network security with password protection, login authentication and limited audience access.

### **Seamless Integrations**

Gain more value by utilizing our integrations with key cloud-based software providers.

### **Audience Engagement**

Control the audience experience with dynamic layout capabilities, a way for presenters to direct the audience to focus on specific presentation content.

### **Speak the Language of Your Customers, Investors and Employees**

Build an inclusive culture that breaks down language barriers, fosters team building, and improves accessibility and inclusivity with live interpretations, captions and transcripts.

### **Customized Branding**

Showcase your brand by adding your logo, color palette and other visual elements to your events.

### **Unmatched Scalability**

Create and host events for an unlimited audience with 100% browser-based access using a single URL.

### **Versatile Delivery**

Broadcast live events or edit and re-purpose recorded material for a simulated live event and post for on-demand viewing.

### **Live Event Support**

Industry-leading, 24/7 in-product support with multimodal access via phone, email, or chat.

### **Comprehensive Reporting**

Measure event metrics with robust reporting and analytics.

### **Advanced Administrator Controls**

Manage presenters, participants and content from an easy-to-use control panel to ensure a smooth, flawless event.
